

## Course guide

# 295911 - EDAN - Data Engineering and a Business Analytics

Last modified: 08/08/2024

**Unit in charge:** Barcelona East School of Engineering  
**Teaching unit:** 732 - OE - Department of Management.

**Degree:** BACHELOR'S DEGREE IN BIOMEDICAL ENGINEERING (Syllabus 2009). (Optional subject).  
BACHELOR'S DEGREE IN CHEMICAL ENGINEERING (Syllabus 2009). (Optional subject).  
BACHELOR'S DEGREE IN ELECTRICAL ENGINEERING (Syllabus 2009). (Optional subject).  
BACHELOR'S DEGREE IN ENERGY ENGINEERING (Syllabus 2009). (Optional subject).  
BACHELOR'S DEGREE IN INDUSTRIAL ELECTRONICS AND AUTOMATIC CONTROL ENGINEERING (Syllabus 2009). (Optional subject).  
BACHELOR'S DEGREE IN MECHANICAL ENGINEERING (Syllabus 2009). (Optional subject).  
BACHELOR'S DEGREE IN MATERIALS ENGINEERING (Syllabus 2010). (Optional subject).

**Academic year:** 2024    **ECTS Credits:** 6.0    **Languages:** Catalan

## LECTURER

---

**Coordinating lecturer:** JUAN MARTINEZ SANCHEZ

**Others:** Primer quadrimestre:  
JUAN MARTINEZ SANCHEZ - Grup: T11

## PRIOR SKILLS

---

Interest in business management and strategy, big data and data analysis.  
Have passed the statistics course. Students must be able to read the bibliography in English, although some parts of the material will be given exclusively in Catalan.

## DEGREE COMPETENCES TO WHICH THE SUBJECT CONTRIBUTES

---

### Specific:

CEB-03. Understand the basics behind the use and programming of PCs, operating systems, databases and software with applications in engineering.  
CEI-17. Understand the applications of business organisation.

### Transversal:

01 EIN N1. ENTREPRENEURSHIP AND INNOVATION - Level 1. Showing enterprise, acquiring basic knowledge about organizations and becoming familiar with the tools and techniques for generating ideas and managing organizations that make it possible to solve known problems and create opportunities.  
06 URI N1. EFFECTIVE USE OF INFORMATION RESOURCES - Level 1. Identifying information needs. Using collections, premises and services that are available for designing and executing simple searches that are suited to the topic.

## TEACHING METHODOLOGY

---

This course alternates lectures with individual exercises and a team project. You must have a minimally updated computer to be able to install the free KNIME and ORANGE software:  
<https://www.knime.com/downloads/download-knime>  
<https://orangedatamining.com/download/>

## LEARNING OBJECTIVES OF THE SUBJECT

The objectives of this course are to learn the main concepts of data science and make introduction to their application in business management, marketing and innovation and decision-making to achieve a competitive advantage.

Learn to apply basic machine learning tools to business problems using high-level visual programming software KNIME and ORANGE that are workflow-based and require no coding. In the second part of the course, Pycaret will be used, a Python library that facilitates the creation of machine learning models by writing very few lines of Python. Basic knowledge of Python is recommended.

## STUDY LOAD

Type	Hours	Percentage
Hours large group	45,0	30.00
Self study	90,0	60.00
Hours small group	15,0	10.00

**Total learning time:** 150 h

## CONTENTS

### title english

#### Description:

- 1 – Introduction to data science applied to decision-making in business management and main technological solutions used.
- 2- Introduction to KNIME/ORANGE Visual programming software based on workflows.
- 3 – Basic Machine Learning with KNIME/ORANGE and business applications.
- 4 – Analysis of text, social networks and web pages, applied to business decision-making
- 5 – Management of data analysis projects in the company and preparation of reports.
- 6 - AutoML with Pycaret

#### Specific objectives:

Learn how to manage data analysis projects as a data capture tool and learn about KNIME as a high-level data analysis software and how it integrates with other solutions such as R or python

#### Full-or-part-time: 150h

Theory classes: 45h

Practical classes: 15h

Self study : 90h

## GRADING SYSTEM

The grade for the course is obtained through the arithmetic mean of the following grades which all have equal weight

- Partial Exam 1 (25%)
- Practical exercises (25%)
- Short questionnaires distributed throughout the course (25%)
- Partial exam 2 (25%)

There is no reassessment exam in this course

There is no reevaluation exam in this course
