

Course guide

804229 - IVJ - Game Industry

Last modified: 15/09/2024

Unit in charge: Image Processing and Multimedia Technology Centre
Teaching unit: 804 - CITM - Image Processing and Multimedia Technology Centre.

Degree: BACHELOR'S DEGREE IN VIDEO GAME DESIGN AND DEVELOPMENT (Syllabus 2014). (Compulsory subject).

Academic year: 2024 **ECTS Credits:** 6.0 **Languages:** Catalan, English

LECTURER

Coordinating lecturer: Hurtado, Daniel

Others:

DEGREE COMPETENCES TO WHICH THE SUBJECT CONTRIBUTES

Specific:

CEVJ 10. Identify the production process and methodologies for developing a video game, and the role of each of the profiles and functions involved.

CEVJ 11. Identify the business, financing and monetisation models of the video game industry, and its digital distribution, monitoring and marketing.

Transversal:

01 EIN N1. ENTREPRENEURSHIP AND INNOVATION - Level 1. Showing enterprise, acquiring basic knowledge about organizations and becoming familiar with the tools and techniques for generating ideas and managing organizations that make it possible to solve known problems and create opportunities.

02 SCS N1. SUSTAINABILITY AND SOCIAL COMMITMENT - Level 1. Analyzing the world's situation critically and systemically, while taking an interdisciplinary approach to sustainability and adhering to the principles of sustainable human development. Recognizing the social and environmental implications of a particular professional activity.

03 TLG. THIRD LANGUAGE. Learning a third language, preferably English, to a degree of oral and written fluency that fits in with the future needs of the graduates of each course.

TEACHING METHODOLOGY

- Exhibition method / master lesson.
- Participatory class.
- Study of cases.
- Learning based on problems and expositions and defenses of practices or jobs.
- Autonomous work.

LEARNING OBJECTIVES OF THE SUBJECT

- Know the history and evolution of videogames from different points of view: eras, studies, platforms, technologies, works and outstanding authors.
- Understand and be able to classify and identify a video game according to different criteria: public gender, model, interaction, theme and support.
- Know the process and each of the stages involved in the development of a video game: pre-production, production and post-production.
- Know, understand and be able to identify the functions of each of the roles that belong to a videogame study as well as its structure and organization.
- Identify and know the different software and design tools, technologies, engines and platforms with which a videogame studio works.
- Analyze and understand the different economic models linked to the videogame industry from its beginnings to the present.
- Show understanding of the concept of the video game industry and knowledge of the different agents involved and of the value chain and knowledge of the evolution and current situation of the video game industry, both nationally and internationally, and its relationship with the evolution of technology.

STUDY LOAD

Type	Hours	Percentage
Hours medium group	18,0	12.00
Guided activities	12,0	8.00
Hours large group	30,0	20.00
Self study	90,0	60.00

Total learning time: 150 h

CONTENTS

Introduction to the videogame industry.

Description:

Video Game Industry: Concept.

Agents involved and value chain of the video game industry.

Analysis of the most relevant data about the videogame industry in Catalonia and Spain.

Full-or-part-time: 10h

Theory classes: 8h

Self study : 2h

Videogame history

Description:

Evolution of the Video Game Industry. Main milestones.

Relationship between technological evolution and the evolution of the videogame industry.

Full-or-part-time: 21h

Theory classes: 8h

Self study : 13h

The development process

Description:

Process of creating a videogame: phases and tasks.

Full-or-part-time: 23h

Theory classes: 8h

Self study : 15h

Organizational model and profiles professionals

Description:

Organization and professional profiles involved in the creation of video games.

Full-or-part-time: 23h

Theory classes: 8h

Self study : 15h

Tools and technologies

Description:

Technologies and computer programs used in the creation of video games.

Full-or-part-time: 23h

Theory classes: 8h

Self study : 15h

Classification of video games

Description:

Criteria for classification and genres of video games.

Full-or-part-time: 23h

Theory classes: 8h

Self study : 15h

Business models

Description:

Business models and financing in the video game industry.

Full-or-part-time: 27h

Theory classes: 12h

Self study : 15h

ACTIVITIES

Practice 1. Analysis of the evolution of one genre of video games

Description:

In practice 1 the student has to develop, in groups, a document about the evolution of one genre of video games. It will be necessary to analyse the origin and the main evolution moments in its history, why those evolutions happened, why are relevant and how are they related with the industry.

Full-or-part-time: 12h

Self study: 6h

Guided activities: 6h

Practice 2. Reflective analysis - Presentations

Description:

For the correct evaluation of practice 2, the student will appear and actively participate in Q & A in a series of lectures given by different professionals in the videogame industry. Subsequently, and at the most after the next session, it will deliver a group and reflective analysis of each paper that must answer, at least, to a series of questions stipulated by the subject's faculty. The relationship capacity of the analysis of each paper with the content of the course is valued, as well as the capacity of analysis and comparison with the background and previous knowledge of the students. The activity responds to a self-evaluation dynamic that will be explained in detail during the first session of the course.

Full-or-part-time: 50h

Self study: 40h

Guided activities: 10h

GRADING SYSTEM

Practices & activities:

- Practice 1, with a weight of 10% of the final grade of the subject.
- Practice 2, with a weight of 15% of the final grade of the subject.
- Activity portfolio, with a weight of 15% of the final grade of the subject.

Midterm exam:

- 1 partial exam with a weight of 25% of the final grade of the subject.

Final exam:

- 1 final exam with a weight of 25% of the final grade of the subject.

Participation and attitude of learning, with a weighting of 10% of the final grade of the subject.

Students who have failed in the continuous assessment can be presented in re-evaluation (as long as the grade is different from NP). The grade obtained in the re-evaluation replaces, if higher, the grades of the partial and final exams. The final grade for the subject, calculated from the re-evaluation exam, can not exceed 5.

Irregular actions that may lead to a significant variation of the grade of one or more students constitute a fraudulent performance of an evaluation act. This action entails the descriptive grade of failure and a numerical grade of 0 for the ordinary global evaluation of the course, without the right to re-evaluation.

If the lecturers have indications of the use of AI tools not allowed in the evaluation tests, they may summon the students concerned to an oral test or a meeting to verify the authorship.

EXAMINATION RULES.

A part of the practices can be done during classes with a teacher. Students must also dedicate autonomous work time (outside of class hours), to perform these practices.

The evaluation of the practices does not only involve the resolution of them, but also the presentation that is made of the results when the group is required to do so during the classes and the realization of the corresponding documents that must be deposited in the classroom of the virtual campus that is enabled for that purpose.

The documents must be completed following the instructions given therein, especially regarding the labeling of the file names and the structure of the content. In no case will the layout of the document be modified or saved in a format or version other than that indicated. The correct management of the documentation provided is an aspect related to the competences to be acquired and is, therefore, object of evaluation.
